

## Intro

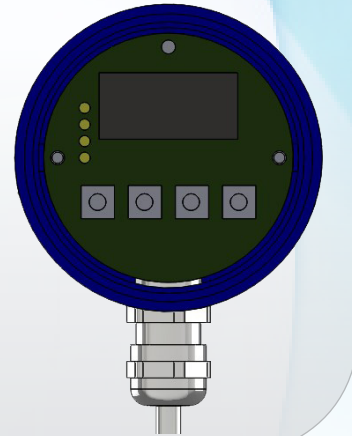

An economical ultrasonic level sensor that can be used as a simple multipoint level switch or for continuous feedback through a 4–20 mA loop.

Compact size with robust construction for industrial or mobile equipment. (55mm dia x 50mm tall) (2.16 in x 2 in)

## Features

- 5" to 118" (13 to 300 cm) sensing range
- 4 digital outputs & 1 analog (4–20 mA) output
- Switch points: 4 levels
- Cast aluminium body with IP65 rating
- 1" NPT Process Connection
- Digital display and programming buttons for setup
- USB programming optional
- Filtering/Compensation for fluid sloshing

\* Subject to Change

## Industries

Industrial hydraulics for monitoring fluid levels in reservoir.

Mobile equipment for monitoring of liquids or solids.

Agricultural equipment for monitoring of liquids or solids.

Monitoring of water levels in streams, rivers, ponds.
